Summary

MERN Stack Developer with internship experience building real products — 90+ Lighthouse score, 45% fewer re-renders, and 30% higher user engagement across two live platforms. Comfortable working on both frontend and backend, from UI design to REST APIs and database work. Experienced with TypeScript, Redux Toolkit, and headless CMS tools. Works well in Agile teams and can lead frontend delivery independently.

Skills

Languages : JavaScript, TypeScript, Java, C/C++

Experience

Codage Habitation — Frontend Developer Intern

Jan 2026 – Present

React.js · Next.js · TypeScript · Tailwind CSS · Redux Toolkit · Sanity · Strapi

Ahmedabad, Gujarat

- Built **25+ UI components** in React.js, TypeScript, and Tailwind CSS for a tax-management platform, improving user engagement by **30%**
- Reduced re-renders by **45%** using Redux Toolkit and React Context API, making the app noticeably faster
- Achieved **90+ Google Lighthouse score** using code splitting, lazy loading, and memoization
- Connected Sanity and Strapi CMS so non-technical team members could update content on their own

Zikasha Consultancy LLP — Software Developer Intern

Feb 2025 – Jul 2025

React.js · Node.js · Express.js · MongoDB · ShadCN/UI

Gandhinagar, Gujarat

- Built a full-stack food delivery platform used by **150+ daily users** with real-time order tracking and cart management
- Built **10+ REST API endpoints** in Node.js and Express.js for login, orders, and meal subscriptions
- Fixed checkout flow and improved form checks, which reduced user-reported order errors

Projects

Daily Dose — Tiffin Ordering & Subscription Platform

2025

React.js · Node.js · Express.js · MongoDB · ShadCN/UI · REST APIs

A live food subscription web app where users can order daily tiffin meals, manage plans, and track orders in real time.

- Sole frontend developer; built a component library with consistent UI **across 10+ pages** for desktop and mobile
- Worked with backend team using shared API contracts to reduce integration issues

E-Commerce Platform — Full Stack MERN Application

2025

MongoDB · Express.js · React.js · Node.js · Third-party Payment API

A complete online shopping platform with product browsing, cart management, and secure payment checkout.

- Built a complete e-commerce site with product listing, cart, and **secure payment integration**
- Added **JWT-based login** with protected routes on both frontend and backend

Querious — Community-Driven Q&A Platform

2024–2025

MongoDB · Express.js · React.js · Node.js · Firebase Authentication

A developer Q&A community platform with upvoting, answer ranking, and user profiles — similar to Stack Overflow.

- Built a Q&A platform with upvoting, answer ranking using **MongoDB aggregation**, and Firebase login
- Designed REST APIs for questions, answers, and votes with proper error handling
